

Technical drawing of a transmission tower cross-section. The tower is a lattice structure with a central vertical axis. It has two main cross-arms. The top cross-arm has a width of 7.30. The bottom cross-arm has a width of 9.60. The tower is supported by a base labeled "EOK". The top of the tower is labeled "LWL". On the right side, there are vertical dimension lines indicating heights of 6.00 and 4.00. Below these, the text "nach Bedarf" is written vertically.
